

Continental Congress 2009

The People Assemble to Restore Constitutional Order Before Liberty is Lost

Our Republic faces a grave Constitutional crisis:

- Economic catastrophe as a direct result of the privately-owned Federal Reserve and a debt-based fiat dollar, conjured without limit
- Unconstitutional bailouts of private corporations using public tax monies, e.g., AIG, TARP, etc.
- Unconstitutionally enforced direct, un-apportioned taxes on the labor of Americans
- Endless Middle-East military conflicts without any required congressional Declaration of War
- Deprivations of privacy Rights and an emerging unlawful police state via the “War on Terrorism”
- A president who refuses to produce legal evidence establishing his status as a “*natural born*” Citizen as required by the Constitution
- Deprivations of the Rights to a People’s Militia and to Keep and Bear Arms
- The violations are escalating without end: the NAU, uncontrolled borders, electronic voting machine fraud, illegal immigration, etc.
- **And the most grievous injury:** A servant government that refuses to be held accountable – *in any way* - by failing to respond, at all, to the People’s repeated First Amendment Petitions for Redress of constitutional Grievances.

The day we arise to hold the Government accountable has arrived!

Historical People’s Summit Called

Later this year, selected delegates representing the People of each of the fifty states will convene as a national assembly to debate our constitutional crisis and establish practical strategies all the People can take to peacefully restore Constitutional Order and reclaim Liberty.

These historical proceedings will be known as the “**Continental Congress 2009**,” or CC2009.

Taking a page from our Founders, the Delegates will convene for a period of several weeks to begin the virtuous task of organizing to resist tyranny and to impose, once again, the yoke of Law upon our uncontrolled federal Government.

The People Possess Fundamental Rights Most Americans Know Nothing About!

The good news is that we have a plan to fight back. The *very good* news is that under our Law, the People possess long-forgotten Rights to directly exercise Popular Sovereignty and hold the government accountable — all without the Judiciary, and without resorting to arms. Learn about CC2009 and our plan to reclaim Liberty:
